## **Jet Linx Enhances Jet Card Member Experience with Complimentary In-Flight Wifi on Super Midsize and Heavy Jet Flights**

**OMAHA, Neb. – [November 12, 2024]** – Jet Linx, the preeminent locally-focused Jet Card and Aircraft Management company with a nationwide presence and the third largest managed fleet of private aircraft in the United States, is pleased to announce that complimentary Wifi is now guaranteed for Jet Card Members on all Super Midsize and Heavy Jet flights in its nationwide fleet. This new benefit exemplifies Jet Linx’s commitment to continually enhancing its private aviation experience through innovative and value-driven improvements.

The guaranteed Wifi on Super Midsize and Heavy Jets allows Jet Linx Jet Card Members to stay connected, productive, and entertained during domestic flights. Super Midsize and Heavy Jets make up more than half of the 110+ aircraft in the nationwide fleet, so the benefit will be widely available to Jet Linx Jet Card Members.

“We are constantly evaluating how to add meaningful value to our services, and complimentary, guaranteed Wifi is one way we can make a significant impact on our clients’ experience,” said Brent Wouters, President and CEO of Jet Linx. “This enhancement reflects our promise to provide unparalleled comfort, convenience, and connectivity to every Jet Linx Jet Card Member.”

In addition to complimentary Wifi, Jet Linx continues to make operational improvements that benefit both Aircraft Owners and Jet Card Members. The Company’s fuel optimization program, for example, has achieved a 30% average savings on fuel costs compared to standard retail prices, providing Jet Linx clients with significant cost savings.

The Jet Linx Executive Jet Card and Jet Linx Club Card offer guaranteed access to a nationwide fleet, private terminals, and fixed hourly rates with no hidden fees or repositioning costs. Both Jet Cards deliver exclusive perks through the Elevated Lifestyle program, allowing members to access premium benefits and services with trusted Jet Linx partners, elevating the entire travel experience.

Jet Linx has also seen healthy growth in its managed fleet of aircraft, including sought-after models such as Cessna Citation Latitude, Cessna Citation CJ4, Cessna Citation XLS+ and

Dassault Falcon 7X. The Company currently operates one of the largest managed fleets in the United States, which includes both Part 135 and Part 91 aircraft. The expanded fleet further strengthens Jet Linx's ability to meet demand while offering guaranteed jet access across 20+ locations nationwide.
